

# 2022

## Seed & Supply

[www.gerriesgardencentre.com](http://www.gerriesgardencentre.com)

Greetings again,

As we finish another year, and plan for the next, we are reminded how temporal and uncertain life is. Some of our customers and friends aren't here to see another year. Certain items in our supply chain, as well as some of our freedoms seem unsure. But we trust in our sovereign, unchanging God who wants to walk with us and gives hope no matter what comes.

As we plan for next year, we are finding there may be availability issues with some varieties, which is out of our control. We are ordering earlier than ever, and we will do our best to serve you in 2022. We wish each one a great gardening experience!

*The Gerrie Family*

**7646 Colborne St. Elora ON N0B 1S0**

## **DISCLAIMER**

Gerrie's Garden Centre believes in delivering a quality product to our customers. However, seed and/or plants are live products and depend on many important grower skills including, planting time, seed depth, type of soil, proper use of fertilizers etc, and weather conditions, which are out of our control. By acceptance of our products the buyer agrees not to hold Gerrie's Garden Centre responsible. At any time, Gerrie's Garden Centre will not be liable for more than the purchase price of the product.

Please note all descriptions and information in this catalog are based on our observations and/or from other sources. Actual yields and characteristics will vary according to weather conditions, soil types, etc.

## **CODES**

HY = Hybrid

\*\* = Royalty Fee

OP = Open Pollinated

M = 1000 seeds

\* = Customer Favourite

SE = Sugar Enhanced

Synergistic = super sweet crossed with sugar enhanced

## SAFE SEED PLEDGE

*"Agriculture and seeds provide the basis upon which our lives depend.*

*We must protect this foundation as a safe and genetically stable source for future generations. For the benefit of all farmers, gardeners and consumers who want an alternative, **we pledge that we do not knowingly buy or sell genetically engineered seeds or plants.** The mechanical transfer of genetic material outside of natural reproductive methods and between genera, families or kingdoms poses great biological risks, as well as economic, political and cultural threats. We feel that genetically engineered varieties have been insufficiently tested prior to public release. More research and testing is necessary to further assess the potential risks of genetically engineered seeds. Further, we wish to support agricultural progress that leads to healthier soils, genetically diverse agricultural ecosystems and ultimately healthy people and communities."*
